Create your Masterpiece

Adding our latest products from the Mythos Masterpiece family to your kitchen will unveil your visionary skills with its on-trend metallic colours and taps with chic industrial styling.

Discover F-Inox, an exclusive Franke coating that groups water molecules and allows you to dry your bowl without ring stains. Water repellent and scratch-resistant, this futuristic coating also fears no boiling water. A real and long-lasting beauty formula that you can appreciate from all our Mythos Masterpiece bowls. You can also take your pick from our range of matching components, with waste kits, push button pop up wastes, overflows and food waste disposer air switches available in the same metallic shades - available at Central Services on 01782 599258.

Box Clever

The Box Center is a smart addition to any kitchen.

The Box Center inset sink is perfect if you love maximising your kitchen storage. There is one full size and one half size bowl. The brushed Stainless Steel finish is sturdy and easy to maintain. The smaller bowl on the right hand side is able to store all of the accessories that come with the sink as standard.

Stunning Steel

Available in an array of undermount or inset models, Mythos and Maris Bowls integrate themselves perfectly in all environments to satisfy space and style needs. These bowls know how to unite refined elegance and high functionality.

For the full range of undermount and flushmount Stainless Steel models, please visit franke.com

Knives and forks won't mark or score the surface.

Even at 280°C the surface will not burn.

Fragranite sinks are highly resistant to staining, marking and fading.

Fragranite sinks are now 30% smoother than before and even easier to keep clean.

SANITIZED®

MYTHOS WATER HUB

We've gone all-in-one WATER YOUR WAY

The new Mythos Water Hub, an innovative all-in-one home water solution allows you to easily choose filtered, sparkling, chilled and instant boiling water without delay.

For all tastes

With a 6-in-1 design approach, you and your guests have a choice of hot or cold, filtered, chilled, sparkling and instant boiling water at the turn of a tap.

Healthier home, healthier planet

Due to having filtered and sparkling water readily available, you can reduce the need for plastic bottles in your home by up to 99%. A small switch for a greener future.

Simplicity under the sink

With its multifunctional system and one box compact solution featuring electronic LED indication for intuitive and easy handling, the new Mythos Water Hub can be easily installed underneath the sink, saving space within the kitchen.

Stay connected

Customise your water experience through a dedicated app and have an overview of usage as well as manage your order wherever and whenever is convenient for you.

Pro M Connect Filter
It prevents limescale formation in the tank, removes contaminants and stabilises good minerals in the water. The integrated RFID technology* ensures the Franke device shares a notification when the filter needs to be changed.

*Radio Frequency Identification

CO2 Bottle
Made in steel and pressurised for safe transportation without loss of gas, and featuring easy turn fixation and release system allowing simple access.

Disinfection kit
Around every 6 months the device as well as the app will suggest a system clean using this specific chemical tablet.

Installation video
How to install the Maris Water Hub with filtration Kit (for filtered water function).

MARIS
WATER
HUB

A welcome addition to the family

The next generation Maris Water Hub delivers a range of impressive features and benefits.

It's available in 3-in-1 and 4-in-1 configurations. Choose either the mechanical or electronic Maris Water Hub Tap and you'll get cold, hot and 100°C instant boiling water on demand. By selecting the electronic version, you'll also get the option to upgrade to the 4-in-1 configuration using the additional filtration kit - adding fresh, clean, filtered water on tap, whenever needed.

Maris Water Hub 3-in-1 Electronic tap

Easy and safe to use with a child-safe electronic control.

Push the electronic control to activate, turn and select either the boiling or filtered water function by the colours shown, push and hold to start the water flow. Once you have the amount of water you need, release the control.

After selecting the boiling water function, push the control twice for a continuous water flow of 30 seconds (around 1L) or three times for 1 minute (around 2L). The water flow will stop automatically.

Whilst in filtered mode, a double push will deliver 15 seconds of continuous flow and a triple push will give 30 seconds of water. Again, after which time, the flow will stop automatically.

Add the Filtration Kit needed to convert your 3-in-1 Maris Electronic tap into a 4-in-1 tap.

Maris Water Hub 3-in-1 Mechanical tap

Simple and safe to use, thanks to the pull-and-turn mechanical control, which allows instant boiling water to flow effortlessly. Then once the control is released, the tap stops automatically when you release the control, making it super easy to operate.

In addition, there is a continuous flow function. To activate this, first pull the control and while turned to operation mode, push it until locked. Then, to stop the flow, pull the control again and turn it to off mode.

Elegant Polished Nickel

Introducing Polished Nickel a new finish to the tap range. It is the ultimate “warm” finish, it is a highly shiny, smooth, mirror like finish with a very slight golden tint. It has a deep lustre and is used primarily in classic settings but on the right product it can be used in contemporary designs where chrome plated products can be too stark. There’s something alluring about Polished Nickel – a polished silver finish that also reveals a warm, champagne, undertone. Possessing a surface that captures crisp lowlights, Polished Nickel offers a uniquely refined and sophisticated look.

K-LINK

K-LINK Technology

Connect for cooking comfort

K-LINK technology creates an intelligent connection between selected induction hobs and hoods for efficient, hands-free convenience in the kitchen. It saves energy and reduces noise created through setting suction levels too high. Once the hob is switched off, the hood continues operating for a short time to remove remaining steam and vapour effectively.
